

Dear Sir: I have been a XM-Sattellite Radio subscriber for several years, I pay to enjoy the freedom to listen to whatever type of music,news,traffic,weather...or just commentary. Having used the now current traffic information to commute 1.50 hr...it has on occasion saved me from being late for work and being stuck in 4pm traffic,due to exact information from expert traffic personal...this was not available on other stations...without other superfluous chatter. The NAB has no jurisdiction over ALL the air waves...those of us who have chosen to PAY..for what we want, have the right to any information XM can provide for us, without interference !! or threats of law suites!!

Respctfully,
Marilyn Gray
